WORK EXPERIENCE

Full Stack Software Developer Intern, Beaufort Solutions

Feb 2022– April 2023

- Collaborated within a dynamic Agile team of 14 developers, contributing to the enhancement of workflows through meticulous project planning, goal-setting, and retrospective meetings.
- Demonstrated proficiency in building web applications and websites using a diverse stack including HTML, CSS, JS, PHP, React, Asp.NET, WordPress, and Shopify.
- Successfully developed Native and Cross-platform mobile applications employing Java, Xamarin Forms, and Swift, showcasing versatility and adaptability across different technologies.
- Took charge of creating comprehensive Wikis, ensuring streamlined documentation for tasks on new platforms. This initiative facilitated continuous ease of updating and deletions for evolving features.
- Shouldered the responsibility of Deployment publishes to Production Servers, ensuring seamless and reliable deployment of applications.
- Executed daily tasks encompassing bug fixes, feature implementations, deployment publishes, and active participation in sprint planning sessions, showcasing a commitment to both short-term objectives and long-term project success.
- Exhibited a high level of efficiency and familiarity with coding, testing, and deployment pipelines on Git and Azure, contributing to the team's overall effectiveness and project delivery.

Community Automation Expert, Freelance

April 2022 – April 2023

- Successfully collaborated with 5 clients over the past year, implementing automation strategies utilizing platforms such as Zapier, Convert Kit, and Make.
- Achieved a 30% average increase in revenue for clients by optimizing online community engagement on platforms such as Circle, Udemy, and Discord.
- Significantly improved sales metrics, contributing to a 40% growth in sales within the online communities.
- Implemented automation solutions that led to a 70% increase in overall community engagement, enhancing the client's online presence.
- Demonstrated efficiency by saving clients resources and time, eliminating the need for multi-person teams and automating major business and e-commerce tasks.

Barista and Counter Attendant, Manna European Bakery & Deli

Sep 2021 – Feb 2022

Baker and Barista, Tim Hortons

April 2019 – Mar 2020

EDUCATION

Bachelor of Science, Computer Science with Co-op
Memorial University of Newfoundland, St. John's, NL

Jan 2019 – May 2024

PROJECTS

House Chores Flutter Application

- Flutter app created to help track household chores amongst roommates with CRUD features on Firebase with a calendar interface and modern UI.
- Runs on Android as well as iOS.

Grocery Tracker Android Application

- Developed a Grocery Tracker Application on Android in Java.
- App contains a login screen with logic for handling sign ups and logins and saves data as per logged in user.
- Built a reusable custom layout in Android Studio to use Recycler View and display a dynamic list based on user's inputs.

Android Audiobook Reader

- Developed a fully functional eBook reader application for Android in Java.
- App contains a Splash Screen with custom layouts.
- Used Android's Media Player Class to handle audio files of any format.
